

Exploring the Sustainability Reporting Landscape

Environmental, social and governance (ESG) has gained momentum in the recent years, particularly in the reporting requirements. ESG considerations have moved from a mere box-ticking exercise to an integral part of corporate strategy, business operations, responsibilities while creating value for all stakeholders.

Objective:

The main purpose of the seminar is to:

- Get insight on the latest ESG and climate risk developments, familiarizing participants on the principles of “Green” Economy, ESG risks / opportunities, and sustainable finance, providing practical guidelines and practices.
- Decode the Corporate Sustainability Reporting Directive (CSRD) which marks a step change in reporting and in the assurance of nonfinancial information in the EU. With the introduction of the CSRD, companies that fall within the scope of the directive are increasingly facing various reporting requirements that they need to comply with. The reporting and disclosure requirements will be analyzed for each of the new ESRS developed by the European Financial Reporting Advisory Group (EFRAG), providing also practical examples and useful sector case studies.

Participants' Profile:

Accountants; Finance professionals; Financial controllers; Investor relationship practitioners; ESG practitioners; Corporate sustainability professionals; Sustainability communications or assurance consultants; Legal professionals; Persons who are interested in understanding sustainability reporting and climate change.

Lecturers' Profile:

Maria Viktoratou is a Senior Manager within a Big Four Firm with over 25 years of professional experience in a variety of sectors whilst in the last 18 years she has mainly focused in the financial services sector.

She has spent several years in Group Finance & Operational Risk departments at a one of the Greek Systemic Banks with vast experience in financial, risk and non-financial reporting requirements. As a consultant has provided subject matter expertise and advisory services on sustainability-related disciplines, including climate, sustainability reporting and stakeholders' engagement. She has supported clients in developing their climate and sustainability strategies to address current and future climate risks, streamlining risk assessment loan processes considering ESG characteristics and client profiles, introducing sustainable finance solutions based on applicable frameworks (Green Bond Framework etc.).

Maria holds a BSc in Applied Accounting from Oxford Brookes University, an MSc in Banking and Finance from HOU and a PGP in Business Analysis from Purdue University.
